

PRAVEEN SHUKLA

📍 New Delhi, IN • in.pshukla@gmail.com | [in LinkedIn](#) [on GitHub](#) [at Website](#)

SUMMARY

Data Analyst experienced in survey operations, primary research, and quantitative analysis using SQL, Python, Excel, and Power BI. Proven track record in managing data quality, KPI monitoring, and generating insights from large-scale datasets. Skilled in coordinating cross-functional teams, optimizing workflows, and supporting field operations, with strong problem-solving abilities and experience delivering 40% faster reporting through automation.

SKILLS

Data & Business Execution: Data Cleaning, Data Validation, Data Reconciliation, Dashboard Development, KPI Reporting, Data Storytelling, Stakeholder Communication
Customer & Product Analytics: Funnel Analysis, Conversion Optimization, A/B Testing, Cohort Analysis, Customer Segmentation, KPI Definition
Tools & Technologies: SQL (Advanced), Excel (Pivot Tables, Data Modeling), Python (pandas, NumPy), Tableau, Power BI
Digital Analytics & Data Systems: Adobe Analytics, Multi-source Data Integration, ETL Pipelines

WORK EXPERIENCE

UNICEF | Donor Intelligence Analyst

New Delhi, IN | 01/2024 – 04/2024

Managed data-driven donor operations for UNICEF, leveraging SQL and Python to streamline pledge tracking and maintain database integrity. Spearheaded donor engagement initiatives raising awareness on child care, protection, and women's empowerment while securing recurring monthly and one-time contributions through targeted outreach. Developed automated performance dashboards in Power BI to monitor fundraising KPIs, cultivating long-term relationships to ensure sustained organizational support and consistent funding growth. By conducting deep-dive trend analysis and automating reporting workflows, I transformed raw donor data into actionable insights to drive strategic decision-making and maximize social impact.

Uber | Operations Performance Analyst

Gurugram, IN | 09/2023 – 12/2023

Supervised customer operations data to identify service bottlenecks and optimize response workflows for Uber. Utilized SQL and Python to conduct deep-dive analysis on high-volume interaction logs, transforming raw operational data into actionable insights for leadership. Developed systematized reporting tools and Power BI visualizations to monitor real-time performance metrics, ensuring consistent service quality and adherence to global operational standards. By streamlining data validation processes and identifying key engagement trends, I improved cross-functional efficiency and supported the delivery of data-backed solutions to enhance the overall user experience.

INTERNSHIP

Ballotpedia | Data Analyst (Incoming)

US (Remote) | 05/2026 – 07/2026

Selected for a nonpartisan fellowship conducting candidate research and data validation for 2026 US midterm elections to ensure high-integrity reporting.

PROJECTS

Donor Retention & Segmentation Analytics

UNICEF, New Delhi | 04/2024

Automated pledge tracking with SQL and Python, ensuring 100% data integrity. Developed Power BI dashboards providing real-time insights that cut reporting time by 40%. Optimized donor engagement and operational efficiency through data-driven strategies.

Donor Segmentation & Strategy: Conducted deep-dive trend analysis to segment donor bases, enabling targeted outreach campaigns centered on child protection and women's empowerment, driving measurable improvements in donor engagement and campaign effectiveness.

Data Automation: Developed end-to-end data pipelines to monitor fundraising health metrics, empowering executive leadership to drive strategic, high-impact decisions across global social initiatives and international development programs.

Omnichannel Ops Performance Dashboard

Uber, Gurugram | 10/2023

Optimized global operations at Uber using SQL and Python to resolve service bottlenecks. Built automated reporting and Power BI dashboards for real-time visibility, ensuring 99% adherence to global standards.

Actionable Insights: Transformed raw operational metadata into executive insights by leveraging AI-powered analytics and Google Colab for rapid prototyping, driving data-backed solutions that enhanced the end-to-end user experience.

Data Integrity & Automation: Streamlined data validation processes using AI-assisted automation, reducing manual reporting overhead by 18 hours/week and improving data accuracy to support executive leadership decision-making.

Data Analytics Workflow Showcase

GitHub | 04/2026

Developed a comprehensive analytics ecosystem spanning SQL, Python, Excel, Tableau and Power BI to solve complex business problems. Designed scalable data workflows and interactive dashboards to simulate production-grade decision-making environments across multiple domains.

Market Trend & Salary Analytics: Conducted comprehensive EDA and ETL using Python (Pandas) and Excel Power Query to identify high-growth skill clusters; developed interactive Power BI dashboards to track global salary trends.

Business Intelligence & AI Integration: Developed advanced SQL models for customer cohort and churn analysis while designing KPI-driven Tableau dashboards to optimize sales performance.

CERTIFICATIONS

Python • SQL • Power BI • Excel • AI for Data Analytics | EF SET • CCC

EDUCATION

University of Delhi | Bachelor of Science (GPA: 8/10)

2019 – 2023

Coursework: Applied Statistics, Quantitative Modeling, Data Analysis, Probability & Statistics, Linear Algebra, Differential Equations, Statistical Mechanics, Computational Physics, ICT, Programming & Web Design, Calculus & Geometry, Real Analysis, Algebra, Thermal Physics, Wave & Optics, Chemical Energetics & Equilibria, Electrochemistry, Web Design using HTML5, PHP Programming, Digital & Analog Instrumentation, Weather Forecasting, Environmental Science.
